MX-1200 Importing Custom Graphics
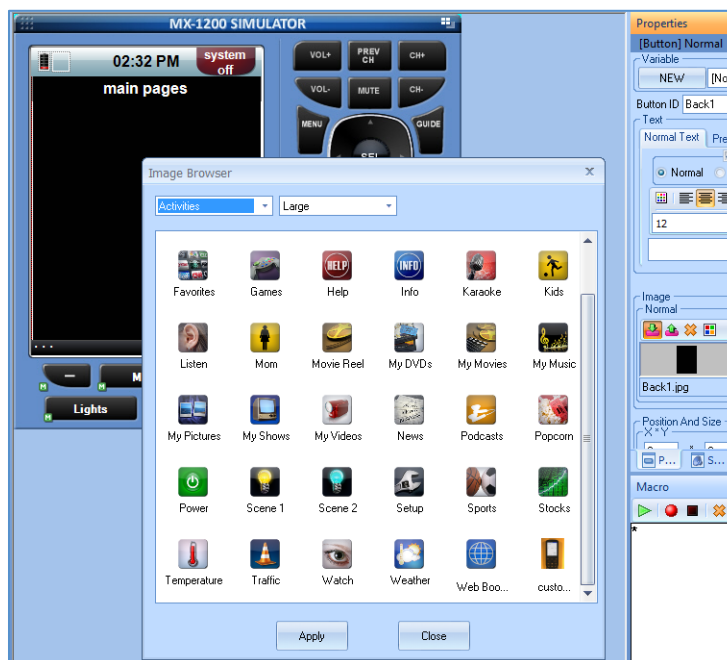

Models Affected: MX-1200

Serial Numbers Affected: NA

Firmware Version: NA

Software: CCP: Complete Control Program

Symptom

- Importing your own images/custom graphics for the MX-1200 in CCP seems impossible. CCP does not provide access to the windows folder structure, which allows you to use your own images.

Solution

Well, you CAN import your custom images into CCP by adding an image(s) to one of CCP's image folder.

1. Make sure the new image is **no larger than** **240 x 320 pixels** (for background images).It will NOT BE POSSSIBLE to resize your image once it is imported, so be sure it is the right size.

   Use the example below to judge the size of the buttons you will create;
   *using the full resolution of 240x320 to fill the entire screen.*

2. Navigate to the following folder location: C:\Program Files (x86)\Universal Remote Control, Inc\Complete Control Program\MX-1200\Images. *(This is the default location where graphic files are saved.)*

3. Choose the **main** folder where you would like to categorize the new image; Activities, Blanks, Brands, Buttons & Backgrounds, Devices, Favorite Channel Icons, or Rooms.

4. Select a "button size" **subfolder** where you would like to save the image; **Large** or **Small.**
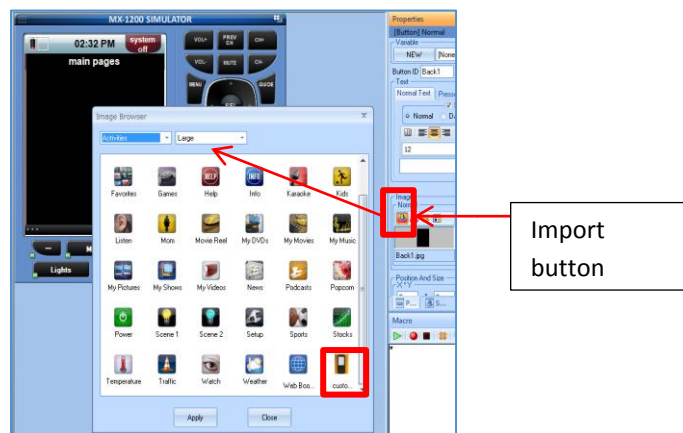

5. **Save** the image in the appropriate folder containing a .vfd file. *(All URC graphics folders for the MX-1200 contain a .vfd file that stores the default URC images in a compressed form. Adding YOUR graphic to the same folder will allow it to be seen by CCP.)*

Custom image placed in the folder containing a .vfd file.

6. Return to the **MX-1200 CCP Image Gallery** and select an onscreen button.
7. Click the Properties window to view the **Image Normal/Pressed** area and select the **Import** button.
8. The **Image Browser** opens. Select the **drop-down boxes** and navigate to the location where you saved the image.
9. **Click** and **drag** the custom image to the MX-1200 screen.
10. **Save** your file.

Import button

I selected Activities/Large and my custom graphic was included.

IMPORTANT: Be sure to leave a copy of the original custom graphics for the customer, as a future upload from the remote WILL NOT retain the images.
